

$$g(n) = k \bar{e}^n + \ln |1 + \bar{e}| \bar{e}^n + \alpha \bar{e}^n$$

$$g(n) = \ln |1 + \bar{e}| \bar{e}^n + 1 \bar{e}^n \quad / \quad 1 = k + \alpha \in \mathbb{R}.$$

$$2) \int n^2 \ln n \, dn$$

on utilise l'intégration par partie

$$\ln n \xrightarrow{d} \frac{1}{n} \, dn \quad (1)$$

$$n^2 \, dn \xrightarrow{\int} \frac{1}{3} n^3 \quad (1)$$

$$\begin{aligned} \int n^2 \ln n \, dn &= \frac{1}{3} n^3 \ln n - \frac{1}{3} \int n^2 \, dn \\ &= \frac{1}{3} n^3 \ln n - \frac{1}{3} \left(\frac{1}{3} n^3 \right) + c \\ &= \frac{1}{3} n^3 \ln n - \frac{1}{9} n^3 + c \quad / \quad c \in \mathbb{R}. \end{aligned} \quad (1)$$

$$3) \int \frac{n}{1+n^2} \, dn$$

$$\begin{aligned} \int \frac{n}{1+n^2} \, dn &= \frac{2}{2} \int \frac{n}{1+n^2} \, dn = \frac{1}{2} \int \frac{2n}{1+n^2} \, dn \\ &= \frac{1}{2} \ln |1+n^2| + c \quad / \quad c \in \mathbb{R} \end{aligned} \quad (2)$$
